

# Build Upon Discipline

## AND RISK CONTROL

Our unique Advanced Active investment management approach applies disciplined, risk-controlled investment strategies that create consistent, competitive investment performance with active risk management. We pioneered the use of sophisticated investment technologies to extract critical market data from around the world for more reliable investment decisions.

Our guiding investment philosophy is built upon four points:

- We apply structured investing techniques to capture systematic opportunities for above-benchmark returns
- We focus on opportunities where technology and process provide comparative advantages
- We eliminate uncompensated risks and minimize implementation costs
- We continuously evolve and improve strategies.

A deep understanding and respect for risk lies at the very core of our investment management approach. Our heritage in academia and science has taught us to leave little to chance.
